**King Lear** William Shakespeare  
2020-11-09T21:49:01Z King Lear is a tragedy by Shakespeare, written about 1605 or 1606. Shakespeare based it on the legendary King Leir

of the Britons, whose story is outlined in Geoffrey of Monmouth's pseudohistorical History of the Kings of Britain (written in about 1136). The play tells the tale of the aged King Lear who is passing on the control of his kingdom to his three daughters. He asks each of them to express their love for him, and the first two, Goneril and Regan

do so effusively, saying they love him above all things. But his youngest daughter, Cordelia, is compelled to be truthful and says that she must reserve some love for her future husband. Lear, enraged, cuts her off without any inheritance. The secondary plot deals with the machinations of Edmund, the bastard son of the Earl of Gloucester, who manages to convince his father that his legitimate son Edgar is plotting against him. After Lear steps down from power, he finds that his elder daughters have no real respect or love for him, and treat him and his followers as a nuisance. They allow the raging Lear to wander out into a storm, hoping to be rid of him, and conspire with Edmund to overthrow the Earl of Gloucester. The play is a moving study of the perils of old age and the true meaning of filial love. It ends tragically with the deaths of both Cordelia and Lear—so tragically, in fact, that performances during the Restoration period sometimes substituted a happy ending. In modern times, though, King Lear is performed as

written and generally regarded as one of Shakespeare's best plays. **Spoken, Broken and Bloody English** Jan Marsh 2002-02 Let me introduce myself.... So begins a remarkable recording, made in 1927, by George Bernard Shaw, at the invitation of the Linguaphone Institute. The great dramatist, then at the height of his fame, was asked to make some observations on how English should be spoken, to be recorded on to a dual disc album - and the great man duly obliged in his inimitable manner. Reprocessed by the latest technology, a CD is included in this book, enabling us all to enjoy, once again, that authentic Shavian wit and wisdom but this time, from the man himself.

**Utopia** Thomas More 2020-05-05 The classic

political satire about an imaginary ideal world by one of the Renaissance's most fascinating figures. Named after a word that translates literally to "nowhere," Utopia is an island dreamed up by Thomas More, a devout Catholic, English statesman, and Renaissance humanist who would be canonized as a saint centuries after he was executed for choosing God over king. More's novel introduces us to Utopia's society and its customs. It is a place of no private property and no lawyers; of six-hour workdays and simple ways; and, intriguingly, of a combination of values that blend the traditional with the highly controversial, from euthanasia to married priests to slavery. Remarkably thought-provoking, it is a novel that asks us to question what makes a perfect world—and whether such a thing is even possible.

## **The Least Developed Countries Report 2016**

United Nations Conference on Trade and Development (UNCTAD) 2016-12-07 Graduation is the process through which least developed countries (LDCs) cease to be members of the LDC category, in recognition of their advances in development. In principle, it marks a shift from dependency to a greater degree of self-sufficiency and emergence from the development "traps" which beset LDCs. However, the loss of access to international support measures (ISMs) tied to LDC status at graduation can give rise to important economic costs, including an estimated 3–4 per cent of export revenues in the case of trade preferences. During the 45 years since the establishment of the LDC category, only four countries have graduated from LDC status; and the Report's projections indicate that the target of half of the LDCs graduating by 2020 is unlikely to be met. This partly reflects the inadequacy of the existing ISMs. The projections also suggest a fundamental

shift in the composition of the group, which by 2025 will consist almost entirely of African countries and include only one small-island economy. The Report argues that graduation should be viewed as part of a longer and broader development process, and emphasizes the need for "graduation with momentum" - an approach which goes beyond fulfilment of the statistical criteria for graduation to lay the foundations for future development. This means prioritizing structural transformation of the economy, development of productive capacities, upgrading technology and raising productivity. The Report highlights several policy areas essential to achieve "graduation with momentum" - rural transformation, industrial policy, science, technology and innovation policy, finance and macroeconomic policy, employment generation and women's empowerment. It calls on the international community to contribute by fulfilling their commitments in areas such as aid and technology. It also suggests possible revisions to

the graduation criteria to reflect more appropriately issues such as structural transformation, environmental sustainability and gender equality.

The charge is unfounded, the persecution needless, but the truth about Silk would astonish even his most virulent accuser. Coleman Silk has a secret, one which has been kept for fifty years

from his wife, his four children, his colleagues, and his friends, including the writer Nathan Zuckerman. It is Zuckerman who comes upon Silk's secret, and sets out to unearth his former buried life, piecing the biographical fragments back together. This is against backdrop of seismic shifts in American history, which take on real, human urgency as Zuckerman discovers more and more about Silk's past and his futile search for renewal and regeneration.

Europe and the Maritime World Michael B. Miller 2012-08-20 Europe and the Maritime World: A Twentieth-Century History offers a framework for understanding globalization over the past century. Through a detailed analysis of ports, shipping and trading companies whose networks spanned the world, Michael B. Miller shows how a European maritime infrastructure made modern production and consumer societies possible. He argues that the combination of overseas connections and close ties to home ports contributed to globalization. Miller also explains how the ability to manage merchant shipping's complex logistics was central to the outcome of both world wars. He chronicles transformations in hierarchies, culture, identities and port city space, all of which produced a new and different maritime world by the end of the century.
