Explain Me This Adele E. Goldberg 2019-02-12 Why our use of language

is highly creative yet also constrained We use words and phrases creatively to express ourselves in ever-changing contexts, readily extending language constructions in new ways. Yet native speakers also implicitly know when a creative and easily interpretable formulation—such as “Explain me this” or “She considered to go”—doesn’t sound quite right. In this incisive book, Adele Goldberg explores how these creative but constrained language skills emerge from a combination of general cognitive mechanisms and experience. Shedding critical light on an enduring linguistic paradox, Goldberg demonstrates how words and abstract constructions are generalized and constrained in the same ways. When learning language, we record partially abstracted tokens of language within the high-dimensional conceptual space that is used when we speak or listen. Our implicit knowledge of language includes dimensions related to form, function, and social context. At the same time, abstract memory traces of linguistic usage-events cluster together on a subset of dimensions, with overlapping aspects strengthened via repetition. In this way, dynamic categories that correspond to words and abstract constructions emerge from partially overlapping memory traces, and as a result, distinct words and constructions compete with one another each time we select them to express our intended messages. While much of the research on this puzzle has favored semantic or functional explanations over statistical ones, Goldberg’s approach stresses that both the functional and statistical aspects of constructions emerge from the same learning mechanisms.

Voice Quality John H. Esling 2022-06-09 The first description of voice quality production in forty years, this book provides a new framework for its study: The Laryngeal Articulator Model. Informed by instrumental examinations of the laryngeal articulatory mechanism, it revises our understanding of articulatory postures to explain the actions, vibrations and resonances generated in the epilarynx and pharynx. It focuses on the long-term auditory-articulatory component of accent in the languages of the world, explaining how voice quality relates to segmental and syllabic sounds. Phonetic illustrations of phonation types and of laryngeal and

oral vocal tract articulatory postures are provided. Extensive video and audio material is available on a companion website. The book presents computational simulations, the laryngeal and voice quality foundations of infant speech acquisition, speech/voice disorders and surgeries that entail compensatory laryngeal articulator adjustment, and an exploration of the role of voice quality in sound change and of the larynx in the evolution of speech.

Iconicity Masako K. Hiraga 2015-02-15 *Iconicity: East Meets West* presents an intersection of East-West scholarship on Iconicity. Several of its chapters thus deal with Asian languages and cultures, or a comparison of world languages. Divided into four categories: general issues; sound symbolism and mimetics; iconicity in literary texts; and iconic motivation in grammar, the chapters show the diversity and dynamics of iconicity research, ranging from iconicity as a driving force in language structure and change, to the various uses of images, diagrams and metaphors at all levels of the literary text, in both narrative and poetic forms, as well as on all varieties of discourse, including the visual and the oral.

Neologisms and COVID-19. Word-Formation Processes Relating to COVID-19 in Articles and Everyday Usage 2020-11-12 Seminar paper from the year 2020 in the subject English Language and Literature Studies - Linguistics, grade: 2,0, University of Flensburg, language: English, abstract: This term paper will guide the reader through a linguistic analysis of different word-formation processes in new words related to COVID-19. The Coronavirus disease, also known as COVID-19, is an infectious disease affecting the respiratory system. More and more confirmed cases are being reported worldwide with each passing day. It

first started in China towards the end of 2019. However, the virus became unstoppable and resulted in an ongoing pandemic. Not only has the virus led to numerous far-reaching educational, political, psychological, and social impacts, but also a major outbreak of new words and idioms. "Established terms such as self-isolating, pandemic, quarantine, lockdown and key workers have increased in use, while coronavirus/ COVID-19 neologisms are being coined quicker than ever" (Lawson 2020). These new words are quickly becoming part of our daily terminology as the virus continues to spread and kills more and more people all over the world. The meaning of many words is probably known, but where these terms also familiar to us six months ago? Nevertheless, what do we understand under the concept of neologisms? Which words have entered the dictionaries? The corpus of this work consists of four articles/ websites from which the analyzed words are taken. The theoretical part consists of definitions and explanations of different word-formation processes, such as abbreviations (including acronyms and initialisms), compounding, blending, and conversion. The third section contains a detailed analysis of 15 words for which concepts from the theoretical part will be used. Subsequently, the conclusion will sum up the findings.

The Glass Bead Game Hermann Hesse 2002-12-06 The Glass Bead Game, for which Hesse won the Nobel Prize for Literature in 1946, is the author's last and crowning achievement, the most imaginative and prophetic of all his novels. Setting the story in the distant postapocalyptic future, Hesse tells of an elite cult of intellectuals who play an elaborate game that uses all the cultural and scientific knowledge of the Ages. The Glass Bead Game is a fascinating tale of the complexity of modern life as well as a classic of modern literature. This edition features a Foreword by Theodore Ziolkowski that places the book in the full context of Hesse's thought.

[On the Royal Road](#) Elfriede Jelinek 2021-04-01 Nobel Prize winner

Elfriede Jelinek is known as a writer who works in response to contemporary crises and cultural phenomena. Perhaps none of her works display that quality as clearly as *On the Royal Road*. Three weeks after Donald Trump's election, Jelinek mailed her German editor the first draft of this monologue, which turns out to be a stunningly prescient response to Trump and what he represents. In this drama we discover that a 'king', blinded by himself, who has made a fortune with real estate, golf courses

and casinos, suddenly rules the United States, and the rest of the people of the world rub their eyes in disbelief until no one sees anything anymore. *On the Royal Road* brings into focus the phenomenon of right-wing populism. Carefully perched somewhere between tragedy and grotesque, high-pitched and squeamish, Jelinek in this work questions her own position and forms of resistance. 'Ms. Jelinek's play is a screed of outrage at the political, economic and cultural forces that have brought us to an unprecedented — and for many, unimaginable — moment of crisis for modern democracy. Mr. Trump is never mentioned by name, but the narration sketches an undisciplined, uncouth monarch who has been propped up by obscene wealth, a nonstop media circus and a remarkable talent for self-aggrandizing...[*On the Royal Road*] is neither a polemic nor a historical dramatization but an of-the-moment allegory for our deeply troubling political, social and economic reality.' — A. J. Goldmann, *New York Times* 'Jelinek's work is brave, adventurous, witty, antagonistic and devastatingly right about the sorriness of human existence, and her contempt is expressed with surprising chirpiness: it's a wild ride.' — *The Guardian*

[Humorous Discourse](#) Wladyslaw Chlopicki 2017-10-23 This book attempts to discuss selected but thorny issues of humor research that form the major stumbling blocks as well as challenges in humor studies at large and thus merit insightful discussion. Any discourse is action, so the text-creation process is always set in a non-verbal context, built of a social and communicative situation, and against the background of relevant culture. On the other hand, humor scholars claim that humorous discourse has its special, essential features that distinguish it from other discourses. The pragmatic solution to the issue of potential circularity of humor defined in terms of discourse and discourse in terms of humor seems only feasible, and thus there is a need to discuss the structure and mechanisms of humorous texts and humorous performances. The chapters in the present volume, contributed by leading scholars in the field of humor studies, address the issues from various theoretical perspectives, from contextual semantics through General Theory of Verbal Humor, cognitive linguistics, discourse studies, sociolinguistics, to

Ontological Semantic Theory of Humor, providing an excellent overview of the field to novices and experts alike.

The Phonetic Description of Voice Quality John Laver 2009-02-12 The importance of an individual's voice in everyday social interaction can scarcely be overestimated. It is an essential element in the listener's analysis of the speaker's physical, psychological and social characteristics. Differences in voice quality reflect different habitual adjustments, or settings, of the vocal apparatus. Individual consonant and vowel segments can be thought of as momentary actions superimposed on these settings and voice quality, as the characteristic sound of a speaker's voice, thus pervades and to a certain extent determines the phonetic character of these linguistic segments. This volume sets out a phonetic description of voice quality, which has largely been neglected in other studies. Dr Laver's integrative approach is a major advance in general phonetic theory and his standardisation of descriptive terminology for the voice will be welcomed by those working in the fields of speech therapy, speech pathology, social psychology and

communications engineering, as well as by students and specialists in speech science, phonetics and phonology.

Die slavischen Sprachen Sebastian Kempgen 2009 The handbook is intended to present a well balanced general view of the current state of Slavic linguistics and the Slavic languages with regard to their synchronic and diachronic description. In contrast to previous undertakings of a similar nature, this handbook is not intended to be a grammar with chapters on individual languages. Its length, the extensive scope of its subject matter, the systematic approach and the method of description which reflect the current state of Slavic Linguistics set this handbook apart from others.

Relevance Dan Sperber 1996-01-09 *Relevance*, first published in 1986, was named as one of the most important and influential books of the decade in the *Times Higher Educational Supplement*. This revised edition includes a new Preface outlining developments in *Relevance Theory* since 1986, discussing the more serious criticisms of the theory, and envisaging possible revisions or extensions. The book sets out to lay the foundation for a unified theory of cognitive science. The authors argue that human cognition has a goal: we pay attention only to information which seems to us relevant. To communicate is to claim someone's attention, and hence to imply that the information communicated is relevant. Thus, a single property - relevance is seen as the key to human communication and cognition. A second important feature of the book is its approach to the study of reasoning. It elucidates the role of background or contextual information in spontaneous inference, and shows that non-demonstrative inference processes can be fruitfully

analysed as a form of suitably constrained guesswork. It directly challenges recent claims that human central thought processes are likely to remain a mystery for some time to come. Thirdly, the authors offer new insight into language and literature, radically revising current view on the nature and goals of verbal comprehension, and in particular on metaphor, irony, style, speech acts, presupposition and implicature.

Linguistic and Cultural Studies: Traditions and Innovations Andrey Filchenko 2017-09-18 This book features contributions to the XVIIth International Conference "Linguistic and Cultural Studies: Traditions and Innovations" (LKTI 2017), providing insights into theory, research, scientific achievements, and best practices in the fields of pedagogics, linguistics, and language teaching and learning with a particular focus on Siberian perspectives and collaborations between academics from other Russian regions. Covering topics including curriculum development, designing and delivering courses and vocational training, the book is intended for academics working at all levels of education striving to improve educational environments in their context - school, tertiary education and continuous professional development.

The Discourse on Gender Identity in Contemporary Russia Dennis Scheller-Boltz 2017-08-01 Conchita Wursts Sieg beim Eurovision Song Contest 2014 war ein zentrales diskursives Moment, welches das derzeitige Spannungsfeld zwischen Postgenderismus und Traditionalismus in Russland offenlegte und aufzeigte, wie sehr Geschlecht und Sexualität, nicht zuletzt für das russische Selbstbild und die Konstruktion einer russischen nationalen Identität, instrumentalisiert und politisiert werden und wie sehr Identitätskonzepte den russischen Alltag mitbestimmen. Die Monografie widmet sich der Diskussion um Geschlecht und Sexualität in Russland nach dem Sieg von Conchita Wurst und untersucht das Verhältnis von Diskurs und Identität. Im Vordergrund steht die Funktion von Sprache sowohl für die Identitätskonstruktion als auch für die Schaffung und Abgrenzung von Räumen. Dabei lassen sich nicht nur lexikologische und wortbildnerische

Besonderheiten beobachten, sondern es liegt insgesamt ein auffälliger Sprachgebrauch mit interessanten Argumentationsstrategien vor. Ausführungen zu Identität und kritische Anmerkungen zur russischen Gender- und Queer-Linguistik komplettieren diesen Band. Conchita Wurst's 2014 victory in the Eurovision Song Contest was a significant discursive moment which revealed the current tensions between postgenderism and traditionalism in contemporary Russia. This case also made clear just how far gender and sexuality are instrumentalised and politicised - not least in creating Russians' self-perception and constructing a Russian national identity - and how massively notions of identity impact on Russian everyday life. The monograph focuses on the discussion of gender and sexuality in Russia following the 2014 event and investigates the relation between discourse and identity. Above all, it is concerned with the function of language in identity construction, and in the creation and demarcation of spaces. In this context, Dr. Scheller-Boltz's study not only analyses lexicological and word-formation peculiarities, but also provides some revealing research findings about specific language use, including certain argumentation strategies. The monograph begins with a detailed introduction to notions of identity and concludes with some critical remarks on Russian gender and queer linguistics.

Intercultural Aspect in Translation and Reception of Precedent Phenomena Andrej Zahorák 2019-06-12 The monograph reflects the specificities associated with the translation and reception process of precedent phenomena in three linguistic and cultural spaces (Slovak, German and Russian).
