Information Economy Report 2017 United Nations Conference on Trade and Development (UNCTAD) 2017-12-28 The Information Economy Report 2017 analyzes the evolving digital economy and its implications for trade and development. While these are still early days of the digital economy, it is already clear that it will have globally transformative impacts on the way we live, work and develop our economies. As the world strives to implement the 2030 Agenda for Sustainable Development, harnessing the power of information and communications technologies (ICTs) is essential. Large parts of the developing world remain disconnected from the Internet, and many people lack access to high-speed broadband connectivity. Policymaking at the national and international levels needs to mitigate the risk that digitalization could widen existing divides and create new gaps. Since increased reliance on digital technologies, such as cloud computing, three-dimensional printing, big data and “the Internet of things”, it is essential to start assessing opportunities and pitfalls alike, and to prepare for what is coming. The analysis contained in the report contributes to this process and proposes ways in which the international community can reduce inequality, enable the benefits of digitalization to reach all people and ensure that no one is left behind by the evolving digital economy.

The Journals of Father Alexander Schmemmann, 1973-1983 Alexander Schmemmann 2000 These journals offer insight into the quiet, intimate side of Father Alexander Schmemmann. They witness to the magnitude of his heart and humanity. Translated and edited by his wife, the abridged journals reveal his recollections and experiences, and record much of his formative creative thought on all manner of subjects between January 1973 and June 1983. **The Visible Text** Thomas A. Bredehoft 2014-01 The Visible Text offers a brand new vision of both literary history and the history of the book. Written accessibly, and with a minimum of specialist terminology or jargon, the book should be useful to those interested in literature, books, and the history of ideas, from undergraduates to professional scholars. Covering every century of English literature, from Anglo-Saxon works like Beowulf to present day comics and graphic novels, The VisibleText gives a new-and often surprising-view of the whole scene of Anglophone literature. Filled with concrete examples of both books and texts, the story told in this book will be of interest to readers in the fields ofliterature, book history, literary theory, media studies, and visual culture.

The Terrible Privacy Of Maxwell Sim Jonathan Coe 2010-05-27 The Terrible Privacy of Maxwell Sim is Jonathan Coe's latest heart-breaking and hilarious novel Maxwell Sim could be any of us. He could be you. He's about to have a mid-life crisis (though eh doesn't know it yet). He'll be found in his car in the north of Scotland, half-naked and alone, suffering hypothermia, with a couple of empty whisky bottles and a boot full of toothbrushes. It's a far cry from a restaurant in Sydney, where his story starts. But then Maxwell Sim has, unknowingly, got a long way to go. If he knew now about his lonely journey to the Shetland Isles, or the truth about his father and the folded photograph, or the mystery of Poppy and her peculiar job, or even about Emma's lovely, fading voice, then perhaps he's stay where he was - hiding from destiny. But Max knows none of it. And nor do you - at least not yet. . . Equal parts funny and moving, The Terrible Privacy of Maxwell Sim will be cherished by readers everywhere, from fans of David Nicholls to Will Self. 'Witty, unexpected and curiously unsettling. Coe carries it off with empathy, comedy and a ventriloquist's ear for idiom' Literary Review 'Clever, engaging, spring-loaded with mysteries and surprises' Time Out 'Masterly, highly engaging. Coe's eye for the details of contemporary life remains as sharp as ever' Daily Mail Jonathan Coe's novels are filled with biting social commentary, moving and astute observations of life and hilarious set pieces that have made him one of the most popular writers of his generation. His other titles, The Accidental Woman, The Rotters' Club (winner of the Everyman Wodehouse prize), The House of Sleep (winner of the1998 Prix Médicis Étranger), A Touch of Love, What a Carve Up! (winner of the 1995 John Llewellyn Rhys Prize) and The Rain Before it Falls, are all available in Penguin paperback.

The Yakut Waldemar Jochelson 2018-06-27 As the first significant anthropological descriptions of northeastern Siberia, the publications of the Jesup North Pacific Expedition, undertaken in the first years of the 20th century, marked not only the beginning of a new era of research in Russia. Jochelson's work The Yakut, for which he draw on results of his earlier fieldwork in that area, was an important milestone for Russian and North American anthropology that provides to this day a unique contribution to thoroughly understanding the cultures of the northeastern Siberia.

Kaira Looro Architecture Competition Balouo Salo 2017-08-23 "Kaira Looro Competition - Sacred Architecture" is an international architectural competition which has as project theme the architectural celebration of the cult in a remote place on earth, where the shortage of materials and high-performing technology pushes the architecture to the branch of sustainability and integration with landscape and culture. Kaira Looro, that in Mandingo language means "Architecture for Peace", is not just architecture, but it also represents the link to a culture, a spirituality and research of interiority.Introspection, spirituality and divinity are the elements around which the sacred architecture revolves. The light and the lightness of the materials join sacred and profane, creating an architecture that, through spaces and forms, try to invite humans to an introspective research . This book collects and describes the 1st, 2nd and 3rd prizes and also 5 mentions and 10 finalists of the competition, nominated by the jury. The competition is organized by the Nonprofit Organization "Balouo Salo" with the collaboration of the University of Tokyo, Kengo Kuma & Associates, CNAPPC, Embassy and Consulate of Senegal, Sedhiou Government, the City of Tanaf and others. The sponsor Four Points by Sheraton Catania provided cash prizes for the winning projects. The winning project and the finalists are named by an internationally renowned jury made up of: Kengo Kuma, Ko Nakamura (University of Tokyo), A. Ghirardelli (SBGA), A. Muzzonigro (Stefano Boeri Architects), R. Bouman (Mohn + Bouman Architects) C. Chiarelli (Arcò), A. Ferrara (Juri Troy Architects), Pilar Diez Rodriguez, R. Kasik (X Architekten), S. D'Urso (University of Catania), I. Gomis (Tanaf Mayor), I. Lutri (InArch), W. Baricchi (CNAPPC). The goal of the contest is to create a symbolic sacred architecture for the whole nation which can improve the precarious conditions of the project area. All proceeds, derived from membership contributions of the participants, are donated to the humanitarian project "A Bridge for Life" in Senegal, to save 80,000 people now at risk of survival. The book also collects 11 projects developed during the Kaira Looro workshop. These projects are focused on the traditional economies of the Casamance region and specifically the Valley of Tanaf. Each proposal, seen in the general master plan, will have to consider the guidelines based on local socio-cultural peculiarities. All of the proceeds of this book will be donated to the non-profit Balouo Salo.

Cities Are Good for You Leo Hollis 2013-04-25 The 21st century will be the age of the city. Already over 50% of the world population live in urban centres and over the coming decades this percentage will increase. Blending anecdote, fact and first hand encounters - from exploring the slums of Mumbai, to visiting roof-top farms in Brooklyn and attending secret dinner parties in Paris, to riding the bus in Latin America - Leo Hollis reveals that we have misunderstood how cities work for too long. Upending long-held assumptions and challenging accepted wisdom, he explores: why cities can never be rational, organised places; how we can walk in a crowd without bumping into people, and if we can design places that make people want to kiss; whether we have the right solution to the problem of the slums; how ants, slime mould and traffic jams can make us rethink congestion. And above all, the unexpected reasons why living in the city can make us fitter, richer, smarter, greener, more creative - and, perhaps, even happier. Cities Are Good for You introduces dreamers, planners, revolutionaries, writers, scientists, architects, slum-dwellers and emperors. It is shaped by the idea that cities are the greatest social experiment in human history, built for people, and by the people.

Geostatistical Applications for Precision Agriculture Margaret A. Oliver 2010-07-27 The aim of this book is to bring together a series of contributions from experts in the field to cover the major aspects of the application of geostatistics in precision agriculture. The focus will not be on theory, although there is a need for some theory to set the methods in their appropriate context. The subject areas identified and the authors selected have applied the methods in a precision agriculture framework. The papers will reflect the wide range of methods available and how they can be applied practically in the context of precision agriculture. This book is likely to have more impact as it becomes increasingly possible to obtain data cheaply and more farmers use onboard digital maps of soil and crops to manage their land. It might also stimulate more software development for geostatistics in PA.

The Inner Life of Empires Emma Rothschild 2012-11-25 The birth of the modern world as told through the remarkable story of one eighteenth-century family They were abolitionists, speculators, slave owners, government officials, and occasional politicians. They were observers of the anxieties and dramas of empire. And they were from one family. The Inner Life of Empires tells the intimate history of the Johnstones—four sisters and seven brothers who lived in Scotland and around the globe in the fast-changing eighteenth century. Piecing together their voyages, marriages, debts, and lawsuits, and examining their ideas, sentiments, and values, renowned historian Emma Rothschild illuminates a tumultuous period that created the modern economy, the British Empire, and the philosophical Enlightenment. One of the sisters joined a rebel army, was imprisoned in Edinburgh Castle, and escaped in disguise in 1746. Her younger brother was a close friend of Adam Smith and David Hume. Another brother was fluent in Persian and Bengali, and married to a celebrated poet. He was the owner of a slave known only as "Bell or Belinda," who journeyed from Calcutta to Virginia, was accused in Scotland of infanticide, and was the last person judged to be a slave by a court in the British isles. In Grenada, India, Jamaica, and Florida, the Johnstones embodied the connections between European, American, and Asian empires. Their family history offers insights into a time when distinctions between the public and private, home and overseas, and slavery and servitude were in constant flux. Based on multiple archives, documents, and letters, The Inner Life of Empires looks at one family’s complex story to describe the origins of the modern political, economic, and intellectual world.

The Ghost of the Executed Engineer Loren Graham 1996-02-01 Stalin ordered his execution, but here Peter Palchinsky has the last word. As if rising from an uneasy grave, Palchinsky’s ghost leads us through the miasma of Soviet technology and industry, pointing out the mistakes he condemned in his time, the corruption and collapse he predicted, the ultimate price paid for silencing those who were not afraid to speak out. The story of this visionary engineer’s life and work, as Loren Graham relates it, is also the story of the Soviet Union’s industrial promise and failure. We meet Palchinsky in pre-Revolutionary Russia, immersed in protests against the miserable lot of laborers in the tsarist state, protests destined to echo ironically during the Soviet worker’s paradise. Exiled from the country, pardoned and welcomed back at the outbreak of World War I, the engineer joined the ranks of the Revolutionary government, only to find it no more open to criticism than the previous regime. His turbulent career offers us a window on debates over industrialization. Graham highlights the harsh irrationalities built into the Soviet system—the world’s most inefficient steel mill in Magnitogorsk, the gigantic and ill-conceived hydroelectric plant on the Dnieper River, the infamously cruel and mislocated construction of the White Sea Canal. Time and again, we see the effects of policies that ignore not only the workers’ and consumers’ needs but also sound management and engineering precepts. And we see Palchinsky’s criticism and advice, persistently given, consistently ignored, continue to haunt the Soviet Union right up to its dissolution in 1991. The story of a man whose gifts and character set him in the path of history, The Ghost of the Executed Engineer is also a cautionary tale about the fate of an engineering that disregards social and human issues.

Of Religion and Empire Robert Geraci 2018-08-06 Russia's ever-expanding imperial boundaries encompassed diverse peoples and religions. Yet Russian Orthodoxy remained inseparable from the identity of the Russian empire-state, which at different times launched conversion campaigns not only to "save the souls" of animists and bring deviant Orthodox groups into the mainstream, but also to convert the empire's numerous Muslims, Buddhists, Jews, Catholics, and Uniates. This book is the first to investigate the role of religious conversion in the long history of Russian state building. How successful were the Church and the state in proselytizing among religious minorities? How were the concepts of Orthodoxy and Russian nationality shaped by the religious diversity of the empire? What was the impact of Orthodox missionary efforts on the non-Russian peoples, and how did these peoples react to religious pressure? In chapters that explore these and other questions, this book provides geographical coverage from Poland and European Russia to the Caucasus, Central Asia, Siberia, and Alaska. The editors' introduction and conclusion place the twelve original essays in broad historical context and suggest patterns in Russian attitudes toward religion that range from attempts to forge a homogeneous identity to tolerance of complexity and diversity.
