**When The World Spoke French** Marc Fumaroli

2011-06-14 A New York Review Books Original

During the eighteenth century, from the death of Louis XIV until the Revolution, French culture set the standard for all of Europe. In Sweden, Austria, Italy, Spain, England, Russia, and Germany, among kings and queens, diplomats, military leaders, writers, aristocrats, and artists, French was the universal language of politics and intellectual life. In *When the World Spoke French*, Marc Fumaroli presents a gallery of portraits of Europeans and Americans who conversed and corresponded in French, along with excerpts from their letters or other writings. These men and women, despite their differences, were all irresistibly attracted to the ideal of human happiness inspired by the Enlightenment, whose capital was Paris and whose king was Voltaire.

Whether they were in Paris or far away, speaking French connected them in spirit with all those who desired to emulate Parisian tastes, style of life, and social pleasures. Their stories are testaments to the appeal of that famous “sweetness of life” nourished by France and its language.

**Iconicity** Masako K. Hiraga 2015-02-15 Iconicity: East Meets West presents an intersection of East-West scholarship on Iconicity. Several of its chapters thus deal with Asian languages and cultures, or a comparison of world languages. Divided into four categories: general issues; sound symbolism and mimetics; iconicity in literary texts; and iconic motivation in grammar, the chapters show the diversity and dynamics of iconicity research, ranging from iconicity as a driving force in language structure and change, to the various uses of images, diagrams and metaphors at all levels of the literary text, in both

narrative and poetic forms, as well as on all varieties of discourse, including the visual and the oral.

**Handbook of Early Language Education** Mila

Schwartz 2022-03-31 This is the first international and interdisciplinary handbook to offer a comprehensive and an in-depth overview of findings from contemporary research, theory, and practice in early childhood language education in various parts of the world and with different populations. The contributions by leading scholars and practitioners are structured to give a survey of the topic, highlight its importance, and provide a critical stance. The book covers preschool ages, and looks at children belonging to diverse ethno-linguistic groups and experiencing different histories and pathways of their socio-linguistic and socio-cultural development and early education. The languages under the scope of this handbook are identified by the contributors as immigrant languages, indigenous, endangered, heritage, regional,

minority, majority, and marginalized, as well as foreign and second languages, all of which are discussed in relation to early language education as the key concept of the handbook. In this volume, “early language education” will refer to any kind of setting, both formal and informal (e.g. nursery, kindergarten, early childhood education centers, complementary early schooling etc.) in which language learning within a context of children's sociolinguistic diversity takes place before elementary school.

*The Grotesque in Western Art and Culture*

Frances S. Connelly 2014-07-31 This book establishes a fresh and expansive view of the grotesque in Western art and culture, from 1500 to the present day. Following the non-linear evolution of the grotesque, Frances S. Connelly analyzes key works, situating them within their immediate social and cultural contexts, as well as their place in the historical tradition. By taking a long historical view, the book reveals the grotesque to be a complex and continuous

tradition comprised of several distinct strands: the ornamental, the carnivalesque and caricatural, the traumatic, and the profound. The book articulates a model for understanding the grotesque as a rupture of cultural boundaries that compromises and contradicts accepted realities. Connelly demonstrates that the grotesque is more than a style, genre, or subject; it is a cultural phenomenon engaging the central concerns of the humanistic debate today. Hybrid, ambivalent, and changeful, the grotesque is a shaping force in the modern era.

Tales of the Narts John Colarusso 2020-11-03 An

exciting collection of mythology about heroes, heroines, villains, and monsters in the intriguing world of the nomad warriors of the Caucasus The Nart sagas are to the Caucasus what Greek mythology is to Western civilization. Tales of the Narts expands the canon of this precious body of lore by presenting a wide selection of fascinating tales that are part of a living tradition among the peoples of Ossetia in southern Russia. A mythical tribe of nomad warriors, the Narts are courageous, bold, and good-hearted, but also capable of envy, cruelty, and violence. In this wonderfully vivid and accessible collection, colorful and exciting heroes, heroines, villains, and monsters pursue their destinies through a series of exploits, often with the intervention of ancient gods.

*Recent Advances in Computational Terminology*  
Didier Bourigault 2001 This first collection of selected articles from researchers in automatic analysis, storage, and use of terminology, and specialists in applied linguistics, computational

linguistics, information retrieval, and artificial intelligence offers new insights on computational terminology. The recent needs for intelligent information access, automatic query translation, cross-lingual information retrieval, knowledge management, and document handling have led practitioners and engineers to focus on automated term handling. This book offers new perspectives on their expectations. It will be of interest to terminologists, translators, language or knowledge engineers, librarians and all others dependent on the automation of terminology processing in professional practices. The articles cover themes such as automatic thesaurus construction, automatic term acquisition, automatic term translation, automatic indexing and abstracting, and computer-aided knowledge acquisition. The high academic standing of the contributors together with their experience in terminology management results in a set of contributions that tackle original and unique scientific issues in correlation with genuine

applications of terminology processing. *Terminology* Maria Teresa Cabré 1999 Beginning with an overview of terminology, this work goes on to discuss the interdisciplinary nature of the field, the foundations of terminology, terminography, computerized terminology, terminology and standardization, and the role of terminologists in a language service, **Collocations in a Learner Corpus** Nadja Nesselhauf 2005 Collocations are both pervasive in language and difficult for language learners, even at an advanced level. In this book, these difficulties are for the first time comprehensively investigated. On the basis of a learner corpus, idiosyncratic collocation use by learners is uncovered, the building material of learner collocations examined, and the factors that contribute to the difficulty of certain groups of collocations identified. An extensive discussion of the implications of the results for the foreign language classroom is also presented, and the contentious issue of the relation of corpus

linguistic research and language teaching is thus extended to learner corpus analysis.

*Under the Shadow of Napoleon* Michael Bonura 2012-05-07 The way an army thinks about and understands warfare has a tremendous impact on its organization, training, and operations. The central ideas of that understanding form a nation's way of warfare that influences decisions on and off the battlefield. From the disasters of the War of 1812, Winfield Scott ensured that America adopted a series of ideas formed in the crucible of the Wars of the French Revolution and epitomized by Napoleon. Reflecting American cultural changes, these French ideas dominated American warfare on the battlefields of the Mexican-American War, the American Civil War, the Spanish-American War, and World War I. America remained committed to these ideas until cultural pressures and the successes of German Blitzkrieg from 1939 - 1940 led George C. Marshall to orchestrate the adoption of a different understanding of warfare. Michael A.

Bonura examines concrete battlefield tactics, army regulations, and theoretical works on war as they were presented in American army education manuals, professional journals, and the popular press, to demonstrate that as a cultural construction, warfare and ways of warfare can be transnational and influence other nations.

**Celtic Literatures in the Twentieth Century** Сборник статей 2017-09-05 «The Centre for Irish and Celtic Studies at the University of Ulster hosted at Coleraine, between the 24th and 26th

August 2000, a very successful and informative conference on 'Celtic Literatures in the Twentieth Century'. The lectures and the discussions were of a high standard, and it was the intention of the organisers to edit and publish the proceedings as soon as possible thereafter. Unfortunately, due to difficulties in assembling some of the papers, this was not possible and, consequently, publication has been delayed much longer than was originally anticipated. Despite this delay, we feel that those papers which we have received merit publication at this time, not only because of their intrinsic merits, but also because they represent the views of the authors on their respective topics at the turn of the twentieth century and will hopefully be of value to those interested in the state of the modern Celtic literatures.»

### **Lexical Functions in Lexicography and Natural Language Processing**

Leo Wanner  
1996-01-01 Lexical Functions in Lexicography and Natural Language Processing is entirely devoted to the topic of Lexical Functions, which

have been introduced in the framework of the Meaning-Text Theory (MTT) as a means for describing restricted lexical co-occurrence and derivational relations. It provides detailed background information, comparative studies of other known proposals for the representation of relations covered by Lexical Functions, as well as a selection of most important works done on and with Lexical Functions in lexicography and computational linguistics. This volume provides excellent course material while it also reports on the state-of-the-art in the field.

Life Beyond Dictionaries Olga M. Karpova  
2015-09-04 This book brings together papers presented at the Tenth International School on Lexicography, titled "Life Beyond Dictionaries" and held in Ivanovo, Russia, and Florence, Italy, in September 2013. It continues the series of edited volumes dealing with the theoretical and practical aspects of lexicography, published by Cambridge Scholars Publishing in 2007, 2009, 2010, and 2013. The book is divided into three

sections, "Lexicography Worldwide: Historical and Modern Perspectives", "Tourism and Heritage Dictionaries with Special Reference to Culture", and "Projects of New Dictionaries". The contributions to this volume investigate problems of world lexicography and its cultural contexts with special reference to projects of new dictionaries. As such, the book will be of interest to theoreticians, lexicographers, and students of linguistic faculties.

**The Alp** Arno Camenisch 2014 The first novel in Arno Camenisch's celebrated "alpine" trilogy is set during a single summer. The four main (unnamed) characters are a dairyman, his farmhand, a cowherd, and a swineherd who all live and work in close proximity -- but this is no Heidi. Theirs is an existence marked by dangerous work, solitude, cruelty, alcoholism, and sheer stubbornness; but the author's handling of these situations and lives is characterized at all times by affection, surreal humor, and a brilliant ear for the sounds of the setting.

**Turning a Bilingual Dictionary Into a Lexical-semantic Database** Thierry Fontenelle 1997 The series features monographs and edited volumes on the topics of lexicography and meta-

lexicography. Works from the broader domain of lexicology are also included if they strengthen the theoretical, methodological and empirical basis of lexicography and meta-lexicography. The volumes focus on aspects of lexicography such as micro- and macrostructure, typology, history of the discipline, and application-oriented lexicographical documentation.

*Journal of Soviet and Post-Soviet Politics and Society* Julie Makarychev, Andrey Umland, Andreas Fedor 2020-10-20 Special Sections: Russian Foreign Policy Towards the "Near Abroad" and Russia's Annexation of Crimea II This special section deals with Russia's post-Maidan foreign policy towards the so-called "near abroad," or the former Soviet states. This is an important and timely topic, as Russia's policy perspectives have changed dramatically since 2013/2014, as have those of its neighbors. The Kremlin today is paradoxically following an aggressive "realist" agenda that seeks to clearly delineate its sphere of influence in Europe and

Eurasia while simultaneously attempting to promote “soft-power” and a historical-civilizational justification for its recent actions in Ukraine (and elsewhere). The result is an often perplexing amalgam of policy positions that are difficult to disentangle. The contributors to this special issue are all regional specialists based either in Europe or the United States.

SHORTLISTED FOR THE TED HUGHES PRIZE 2015  
Tabard Inn to Canterb'ry Cathedral, Poet pilgrims competing for free picks, Chaucer Tales, track by track, it's the remix From below-the-belt base to the topnotch; I won't stop all the clocks with a stopwatch when the tales overrun, run offensive, or run clean out of steam, they're authentic and we're keeping it real, reminisce this: Chaucer Tales were an unfinished business. In Telling Tales award-winning poet Patience Agbabi presents an inspired 21st-Century remix of Chaucer's Canterbury Tales retelling all of the stories, from the Miller's Tale to the Wife of

Bath's in her own critically acclaimed poetic style. Celebrating Chaucer's Middle-English masterwork for its performance element as well as its poetry and pilgrims, Agbabi's newest collection is utterly unique. Boisterous, funky, foul-mouthed, sublimely lyrical and bursting at the seams, Telling Tales takes one of Britain's most significant works of literature and gives it thrilling new life.

#### Field Techniques in an Urban Language Study

Roger W. Shuy 1968 This volume is essentially a report of the methodology employed in the survey of Detroit speech carried out in 1966-67 by the staff of the Detroit Dialect Study. Research was done through Michigan State Univ. under contract with the Cooperative Research Branch, U.S. Office of Education. As a methodological

study, this work is generally descriptive rather than theoretical in order to provide a practical base for large-scale urban language study.

#### **Construction Grammar and its Application to English** Martin Hilpert 2014-03-17

Construction Grammar explains how knowledge of language is organized in speakers' minds. The central and radical claim of Construction Grammar is that linguistic knowledge can be fully described as knowledge of constructions, which are defined as symbolic units that connect a linguistic form with meaning.

#### *Power & Purity* Carol Lansing 1998-02-12

Catharism was a popular medieval heresy based on the belief that the creation of humankind was a disaster in which angelic spirits were trapped in matter by the devil. Their only goal was to escape the body through purification. Cathars denied any value to material life, including the human body, baptism, and the Eucharist, even marriage and childbirth. What could explain the long popularity of such a bleak faith in the towns

of southern France and Italy? *Power and Purity* explores the place of Cathar heresy in the life of the medieval Italian town of Orvieto. Based on extensive archival research, it details the social makeup of the Cathar community and argues that the heresy was central to the social and political changes of the 13th century. The late 13th-century repression of Catharism by a local inquisition was part of a larger redefinition of civic and ecclesiastical authority. Author Carol Lansing shows that the faith attracted not an alienated older nobility but artisans, merchants, popular political leaders, and indeed circles of women in Orvieto as well as Florence and Bologna. Cathar beliefs were not so much a pessimistic anomaly as a part of a larger climate of religious doubt. The teachings on the body and the practice of Cathar holy persons addressed questions of sexual difference and the structure of authority that were key elements of medieval Italian life. The pure lives of the Cathar holy people, both male and female, demonstrated a

human capacity for self-restraint that served as a powerful social model in towns torn by violent conflict. This study addresses current debates about the rise of persecution, and argues for a climate of popular toleration. *Power and Purity* will appeal to historians of society and politics as well as religion and gender studies.
