This book earns very high marks. The material is organized beautifully. ... The writing is informal and clear. ... The author's concern with the behavioral consequences of social cognition is laudable." -- Contemporary Psychology

**Making War, Not Love** Emil Draitser 1999-01-09 Published by St. Martin's Press (1999), this book shows how one pithy joke encapsulates a world of knowledge about a culture. Because humor plays with the most deeply seated cultural assumptions, it makes visible areas of unacknowledged attitudes and behaviors in private realms. In this groundbreaking study, through the content analysis of over 600 jokes, proverbs, sayings, and popular rhymes, Emil Draitser offers an insider's view on the sociological and psychological functions of Russian sexual folklore and the way it reflects male/female relationships. Draitser leaves no dirty joke untold as he examines such taboo subjects as adultery, impotence, and gender and violence. This timely study sheds light on Russian popular culture and the nature of sexual humor everywhere.

**Noun Classes and Categorization** Colette Grinevald Craig 1986-01-01 This volume is about the nature of categories in cognition and the relevance of these in language description, especially classifier systems. The classical view of categories was that they were discrete and based upon clusters of properties which were inherent to the entities. In recent years this conception has been challenged in different fields. By now prototype theory has established itself as one of

the main approaches in linguistics. This volume brings classifier systems to the attention of cognitive psychologists dealing with the phenomenon of human categorization. For the general linguist it shows what can be learned from classifier systems into any theory on the nature of language organization, it will challenge some of the most entrenched notions in the field of linguistics, notions of what language is made of and how it functions.

**Epistemic Modality, Language, and Conceptualization** Jan Nuyts 2001 The relationship between language and conceptualization remains one of the major puzzles in language research. This monograph addresses this issue by means of an in depth corpus based and experimental investigation of the major types of expressions of epistemic modality in Dutch, German and English. By adopting a systematic functional orientation, the book explains a whole range of peculiarities of epistemic expression forms (synchronically and diachronically), and it offers a clear perspective on which cognitive systems are needed to get from the concept of epistemic modality to its linguistic expression. On that basis the author postulates a sophisticated, layered view of human conceptualization. This book is of interest both to scholars working on modality and related semantic dimensions, and to the interdisciplinary field of researchers concerned with the cognitive systems involved in language use.

successful Contemporary Cultures series covers the period from period 1953, with the death of Stalin, to the present day. Both 'Russian' and 'Culture' are defined broadly. *Manual of the Maru Language* Walter Bulmer Tate Abbey 1899

*Resonant Dissonance* Seth Graham 2009-09-18 In his original new study, Seth Graham analyzes a rich and forgotten vein of humor in an otherwise bleak environment. The late Soviet period (1961–1986) hardly seems fertile ground for humor, but Russian jokes (anekdoty) about life in the Soviet Union were ubiquitous. The cultural and political relaxation in the decade following Stalin's death produced considerable optimism among Soviet citizens. The anecdote exploited and exposed what Graham calls "Soviet diglossia" (official Sovietese vs. Russian everyday language) and emphasized the distance between official myths and quotidian reality. Jokes engaged a range of official and popular culture genres and also worked meta-textually, referring to the political consequences of jokes. While the dissidents of this period, who stressed the heroic and opposed everything Soviet, have been much written about, Graham's work on the anecdote-written in the third person, ironic, and engaged with everything Soviet-fills a hole that has been overlooked in cultural history.

**Of Religion and Empire** Robert Geraci 2018-08-06 Russia's ever-expanding imperial boundaries encompassed diverse peoples and religions. Yet Russian Orthodoxy remained inseparable from the identity of the Russian empire-state, which at different times launched conversion campaigns not only to "save the souls" of animists and bring deviant Orthodox groups into the mainstream, but also to convert the empire's numerous Muslims, Buddhists, Jews, Catholics, and Uniates. This book is the first to investigate the role of religious conversion in the long history of Russian state building. How successful were the Church and the state in proselytizing among religious minorities? How were the concepts of Orthodoxy and Russian nationality shaped by the religious diversity of the empire? What was the impact of Orthodox missionary efforts on the non-Russian

peoples, and how did these peoples react to religious pressure? In chapters that explore these and other questions, this book provides geographical coverage from Poland and European Russia to the Caucasus, Central Asia, Siberia, and Alaska. The editors' introduction and conclusion place the twelve original essays in broad historical context and suggest patterns in Russian attitudes toward religion that range from attempts to forge a homogeneous identity to tolerance of complexity and diversity.

**Context as Other Minds** T. Givón 2005-07-22 Givon's new book re-casts pragmatics, and most conspicuously the pragmatics of sociality and communication, in neuro-cognitive, bio-adaptive, evolutionary terms. The fact that context, the core notion of pragmatics, is a framing operation undertaken on the fly through judgements of relevance, has been well known since Aristotle, Kant and Peirce. But the context that is relevant to the pragmatics of sociality and

communication is a highly specific mental operation – the mental modeling of the interlocutor's current, rapidly shifting belief-and-intention states. The construed context of social interaction and communication is thus a mental representation of other minds. Following a condensed intellectual history of pragmatics, the book investigates the adaptive pragmatics of lexical-semantic categories – the 1st-order framing of “reality”, what cognitive psychologists call “semantic memory”. Utilizing the network model, the book then takes a fresh look at the adaptive underpinnings of metaphoric meaning. The core chapters of the book outline the re-interpretation of “communicative context” as the systematic, on-line construction of mental models of the interlocutor's current, rapidly-shifting states of belief and intention. This grand theme is elaborated through examples from the grammar of referential coherence, verbal modalities and clause-chaining. In its final chapters, the book pushes pragmatics beyond its traditional bounds, surveying its interdisciplinary implications for philosophy of science, theory of personality, personality disorders and the calculus of social interaction.
