**Protection of Materials and Structures from Space Environment**
J. Kleiman 2006-04-11 This publication presents the proceedings of ICPMSE-6, the sixth international conference on Protection of Materials and Structures from Space Environment, held in Toronto May 1-3, 2002. The ICPMSE series of meetings became an important part of the LEO space community since it was started in 1991. Since then, the meeting has grown steadily, attracting a large number of engineers, researchers, managers, and scientists from industrial companies, scientific institutions and government agencies in Canada, U. S. A. , Asia, and Europe, thus becoming a true international event. This year’s meeting is gaining even stronger importance with the resumption of the ISS and other space projects in LEO, GEO and Deep Space. To reflect on these activities, the topics in the program have been extended to include protection of materials in GEO and Deep Space. The combination of a broad selection of technical and scientific topics addressed by internationally known speakers with the charm of Toronto and the hospitality of the organizers brings participants back year after year. The conference was hosted and organized by Integrity Testing Laboratory Inc. (ITL), and held at the University of Toronto’s Institute for Aerospace Studies (UTIAS). The meeting was sponsored by the Materials and Manufacturing Ontario (MMO) and the CRESTech, two Ontario Centres of Excellence; Air Force Office of Scientific Research (AFOSR/NL); MD Robotics; EMS Technologies; The Integrity Testing Laboratory (ITL); and the UTIAS.

*Understanding Inequality: Social Costs and Benefits*
Amanda Machin 2016-04-14 The contributions in this book highlight, contextualize and analyze different aspects of social inequality. What are the various cause and effects of inequality? How have these changed over recent decades? Which social policies might be best able to intervene? Written by authors from a variety of disciplines and geographical regions, these contributions provide a rich account of inequality within contemporary society. The role of the state, the media and the market in exacerbating and alleviating patterns of equality are all accessed alongside analysis of changing patterns of exclusion and hierarchy.
**Russian Nationalism**
Marlene Laruelle 2018-10-10 This book, by one of the foremost authorities on the subject, explores the complex nature of Russian nationalism. It examines nationalism as a multilayered and multifaceted repertoire displayed by a myriad of actors. It considers nationalism as various concepts and ideas emphasizing Russia’s distinctive national character, based on the country’s geography, history, Orthodoxy, and Soviet technological advances. It analyzes the ideologies of Russia’s ultra-nationalist and far-right groups, explores the use of nationalism in the conflict with Ukraine and the annexation of Crimea, and discusses how Putin’s political opponents, including Alexei Navalny, make use of nationalism. Overall the book provides a rich analysis of a key force which is profoundly affecting political and societal developments both inside Russia and beyond.

*A Sacred Space Is Never Empty*
Victoria Smolkin 2018 When the Bolsheviks set out to build a new world in the wake of the Russian Revolution, they expected religion to die off. Soviet power used a variety of tools—from education to propaganda to terror—to turn its vision of a Communist world without religion into reality. Yet even with its monopoly on ideology and power, the Soviet Communist Party never succeeded in overcoming religion and creating an atheist society. A Sacred Space Is Never Empty presents the first history of Soviet atheism from the 1917 revolution to the dissolution of the Soviet Union in 1991. Drawing on a wealth of archival material and in-depth interviews with those who were on the front lines of Communist ideological campaigns, Victoria Smolkin argues that to understand the Soviet experiment, we must make sense of Soviet atheism. Smolkin shows how atheism was reimagined as an alternative cosmology with its own set of positive beliefs, practices, and spiritual commitments. Through its engagements with religion, the Soviet leadership realized that removing religion from the "sacred spaces" of Soviet life was not enough. Then, in the final years of the Soviet experiment, Mikhail Gorbachev—in a stunning and unexpected reversal—abandoned atheism and reintroduced religion into Soviet public life. A Sacred Space Is Never Empty explores the meaning of atheism for religious life, for Communist ideology, and for Soviet politics.

**Russia - Art Resistance and the Conservative-Authoritarian Zeitgeist**
Lena Jonson 2017-10-30 This book explores how artistic strategies of resistance have survived under the conservative-authoritarian regime which has been in place in Russia since 2012. It discusses the conditions under which artists work as the state spells out a new state cultural policy, aesthetics change and the state attempts to define what constitutes good taste. It examines the approaches artists are adopting to resist state oppression and to question the present system and attitudes to art. The book addresses a wide range of issues related to these themes, considers the work of individual artists and includes besides its focus on the visual arts also some discussion of contemporary theatre. The book is interdisciplinary: its authors include artists, art historians, theatre critics, historians, linguists, sociologists and political scientists from Russia, Europe and the United States.

**Legal Literacy in Premodern European Societies**
Mia Korpiola 2018-10-10 This book analyses the legal literacy, knowledge and skills of people in premodern and modernizing Europe. It examines how laymen belonging both to the common people and the elite acquired legal knowledge and skills, how they used these in advocacy and legal writing and how legal literacy became an avenue for social mobility. Taking a comparative approach, contributors consider the historical contexts of England, Finland, France, Germany, Italy and Sweden. This book is divided into two main parts. The first part discusses various groups of legal literates (scriveners, court of appeal judges and advocates) and their different paths to legal literacy from the Middle Ages to the nineteenth century. The second part analyses the rise of the ownership and production of legal literature - especially legal books meant for laymen - as means for acquiring a degree of legal literacy from the eighteenth to the early twentieth century.

*The Craft of Probabilistic Modelling*
J. Gani 2012-12-06 This book brings together the personal accounts and reflections of nineteen mathematical model-builders, whose specialty is probabilistic modelling. The reader may well wonder why, apart from personal interest, one should commission and edit such a collection of articles. There are, of course, many reasons, but perhaps the three most relevant are: (i) a philosophical interest in conceptual models; this is an interest shared by everyone who has ever puzzled over the relationship between thought and reality; (ii) a conviction, not unsupported by empirical evidence, that probabilistic modelling has an important contribution to make to scientific research; and finally (iii) a curiosity, historical in its nature, about the complex interplay between personal events and the development of a field of mathematical research, namely applied probability. Let me discuss each of these in turn. Philosophical Abstraction, the formation of concepts, and the construction of conceptual models present us with complex philosophical problems which date back to Democritus, Plato and Aristotle. We have all, at one time or another, wondered just how we think: are our thoughts, concepts and models of reality approximations to the truth, or are they simply functional constructs helping us to master our environment? Nowhere are these problems more apparent than in mathematical model ing, where idealized concepts and constructions replace the imperfect realities for which they stand.

*Transcendentalism Overturned*
Anna-Teresa Tymieniecka 2011-04-02 This collection offers a critical assessment of transcendentalism, the understanding of consciousness, absolutized as a priori laws of the mind, that was advanced by Kant and Husserl. As these studies show, transcendentalism critically informed 20th Century phenomenological investigation into such issues as temporality, historicity, imagination, objectivity and subjectivity, freedom, ethical judgment, work, praxis. Advances in science have now provoked a questioning of the absolute prerogatives of consciousness. Transcendentalism is challenged by empirical reductionism. And recognition of the role the celestial sphere plays in life on planet earth suggests that a radical shift of philosophy’s center of gravity be made away from absolute consciousness and toward the transcendental forces at play in the architectonics of the cosmos.

**Russian Messianism**
Peter J. S. Duncan 2002-11-01 This is the first book in English for half a century to examine the complexities of Russian messianism, both as a whole and in its interaction with Communism. Peter Duncan considers its Orthodox roots and focuses on

Russia’s geopolitical experience and situation to explain the endurance of this phenomenon.

**Linguistic Authority, Language Ideology, and Metaphor**
Neil Bermel 2007-01-01 How does a country find itself ‘at war’ over spelling? This book focuses on a crucial juncture in the post-communist history of the Czech Republic, when an orthographic commission with a moderate reformist agenda found itself the focus of enormous public controversy. Delving back into history, Bermel explores the Czech nation’s long tradition of intervention and its association with the purity of the language, and how in the twentieth century an ascendant linguistic school - Prague Functionalism - developed into a progressive but centralizing ideology whose power base was inextricably linked to the communist regime. Bermel looks closely at the reforms of the 1990s and the heated public reaction to them. On the part of language regulators, he examines the ideology that underlay the reforms and the tactics employed on all sides to gain linguistic authority, while in dissecting the public reaction, he looks both at conscious arguments marshaled in favor of and against reform and at the use, conscious and subconscious, of metaphors about language. Of interest to faculty and students working in the area of language, cultural studies, and history, especially that of transitional and post-communist states, this volume is also relevant for those with a more general interest in language planning and language reform. The book is awarded with the “The George Blazyna Prize in East European Studies 2008”.

**The Construct of Identity in Hellenistic Judaism**
Erich S. Gruen 2016-09-12 This book collects twenty two previously published essays and one new one by Erich S. Gruen who has written extensively on the literature and history of early Judaism and the experience of the Jews in the Greco-Roman world. His many articles on this subject have, however, appeared mostly in conference volumes and Festschriften, and have therefore not had wide circulation. By putting them together in a single work, this will bring the essays to the attention of a much broader scholarly readership and make them more readily available to students in the fields of ancient history and early Judaism. The pieces are quite varied, but develop a number of connected and related themes: Jewish identity in the pagan world, the literary representations by Jews and pagans of one another, the interconnections of Hellenism and Judaism, and the Jewish experience under Hellenistic monarchies and the Roman empire.

*Sergei M. Eisenstein*
Naum Kleiman 2016-06-03 Sovjetregisseur en filmtheoreticus Sergei M. Eisenstein werkte in 1946 en 1947 een jaar voor zijn dood aan een algemene geschiedenis van de cinema. De manier waarop hij de geschiedschrijving van van de cinema benadert, is tegelijk fascinerend in haar ambitie en uiterst modern in haar methode. Eisenstein presenteert hier een virtuele wereldkaart van alle aan de bioscoop gerelateerde media, en ontwikkelt op hetzelfde moment een methode voor het schrijven van een geschiedenis die net als de cinema is gebaseerd op montage. De teksten van Eisenstein worden begeleid door een reeks kritische essays, geschreven door enkele van ‘s werelds meest gekwalificeerde Eisensteinkenners.

**Blue Cats and Chartreuse Kittens**
Patricia Lynne Duffy 2011-04-01 Imagine a world in which words have colors and sounds have tastes. In his autobiography, Vladimir Nabokov described this neurological phenomenon, which helped inspire David Hockney’s sets for the Metropolitan Opera. Richard Feynman experienced it while formulating the quantum theory that won him a Nobel Prize. Sometimes described as a blending of perceptions, synesthesia occurs when only one of the fives senses is aroused but two respond. Journalist Patricia Lynne Duffy draws from her own struggles and breakthroughs with synesthesia to help us better understand the condition, while describing some of the major theories surrounding it. An illuminating examination of the world of synesthetes, Blue Cats and Chartreuse Kittens is a must-read for science and health buffs, as well as for artists, writers, and creative thinkers-or anyone generally intrigued by the brain, the senses, and perception.

**The Cambridge Handbook of Acculturation Psychology**
David L. Sam 2006-08-03 In recent years the topic of acculturation has evolved from a relatively minor research area to one of the most researched subjects in the field of cross-cultural psychology. This edited handbook compiles and systemizes the current state of the art by exploring the broad international scope of acculturation. A collection of the world’s leading experts in the field review the various contexts for acculturation, the central theories, the groups and individuals undergoing acculturation (immigrants, refugees, indigenous people, expatriates, students and tourists) and discuss how current knowledge can be applied to make both the process and its outcome more manageable and profitable. Building on the theoretical and methodological framework of cross-cultural psychology, the authors focus specifically on the issues that arise when people from one culture move to another culture and the reciprocal adjustments, tensions and benefits involved.

**Twelve Years a Slave**
Solomon Northup 101-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

**Sociology and Empire**
George Steinmetz 2013-06-05 The revelation that the U.S. Department of Defense had hired anthropologists for its Human Terrain System project—assisting its operations in Afghanistan and Iraq—caused an uproar that has obscured the participation of sociologists in similar Pentagon-funded projects. As the contributors to *Sociology and Empire* show, such affiliations are not new.

Sociologists have been active as advisers, theorists, and analysts of Western imperialism for more than a century. The collection has a threefold agenda: to trace an intellectual history of sociology as it pertains to empire; to offer empirical studies based around colonies and empires, both past and present; and to provide a theoretical basis for future sociological analyses that may take empire more fully into account. In the 1940s, the British Colonial Office began employing sociologists in its African colonies. In Nazi Germany, sociologists played a leading role in organizing the occupation of Eastern Europe. In the United States, sociology contributed to modernization theory, which served as an informal blueprint for the postwar American empire. This comprehensive anthology critiques sociology’s disciplinary engagement with colonialism in varied settings while also highlighting the lasting contributions that sociologists have made to the theory and history of imperialism. **Imaging Russia 2000**
Anna M. Lawton 2004 "Anna Lawton deftly tells two stories--one about the evolution of Russian film since the collapse of the Soviet Union in 1991, and the other about Russian life during that same period. She managed to capture a vivid portrait of Moscow of the 1990s, and to remind us that the Soviet past remains omnipresent in the new Russia. Russia 2000: Film and Facts is a must read for anyone who cares about Russia, or about film."Blair Ruble, Director, The Kennan Institute of the Woodrow Wilson Center.

**Invention of Tradition and Syncretism in Contemporary Religions**
Stefania Palmisano 2017-09-28 This book explores manifestations of creativity in the religious domain. Specifically, the contributions focus on the nexus of the sacred and the creative, and the mechanisms of syncretism and (re)invention of tradition by which this manifestations occur. The text is divided into two sections. In the first, empirical cases of spirituality characterized by syncretistic processes are highlighted; in the second, examples which can be traced back to forms of the (re)invention of tradition are examined. The authors document possible forms of adaptations and religious enculturation. In the second, the authors demonstrate that spiritual traditions, whether ancient or historically fictitious, are suitable for reframing in the context of critical interpretative frameworks related to cultural expectations which challenge them and call their continuity into question.

**Becoming Muslim in Imperial Russia**
Agnès Nilüfer Kefeli 2014-12-18 In the nineteenth century, the Russian Empire’s Middle Volga region (today’s Tatarstan) was the site of a prolonged struggle between Russian Orthodoxy and Islam, each of which sought to solidify its influence among the frontier’s mix of Turkic, Finno-Ugric, and Slavic peoples. The immediate catalyst of the events that Agnès Nilüfer Kefeli chronicles in *Becoming Muslim in Imperial Russia* was the collective turn to Islam by many of the region’s Kräshens, the Muslim and animist Tatars who converted to Russian Orthodoxy between the sixteenth and eighteenth centuries. The traditional view holds that the apostates had really been Muslim all along or that their conversions had been forced by the state or undertaken voluntarily as a matter of convenience. In Kefeli’s view, this argument vastly oversimplifies the complexity of a region where many participated in the religious cultures of both Islam and Orthodox Christianity and where a vibrant Kräshen community has survived to the present. By analyzing Russian, Eurasian, and Central Asian ethnographic, administrative, literary, and missionary sources, Kefeli shows how traditional education, with Sufi mystical components, helped to Islamize Finno-Ugric and Turkic peoples in the Kama-Volga countryside and set the stage for the development of modernist Islam in Russia. Of particular interest is Kefeli’s emphasis on the role that Tatar women (both Kräshen and Muslim) played as holders and transmitters of Sufi knowledge. Today, she notes, intellectuals and mullahs in Tatarstan seek to revive both Sufi and modernist traditions to counteract new expressions of Islam and promote a purely Tatar Islam aware of its specificity in a post-Christian and secular environment.

**Science Fiction Literature in East Germany**
Sonja Fritzsche 2006 East German science fiction enabled its authors to create a subversive space in another time and place. One of the country’s most popular genres, it outlined futures that often went beyond the party’s official version. Many utopian stories provided a corrective vision, intended to preserve and improve upon East German communism. This study is an introduction to East German science fiction. The book begins with a chapter on German science fiction before 1949. It then spans the entire existence of the country (1949-1990) and outlines key topics essential to understanding the genre: popular literature, socialist realism, censorship, fandom, and international science fiction. An in-depth discussion addresses notions of high and low literature, elements of the fantastic and utopia as critical narrative strategies, ideology and realism in East German literature, gender, and the relation between literature and science. Through a close textual analysis of three science fiction novels, the author expands East German literary history to include science fiction as a valuable source for developing a multi-faceted understanding of the country’s short history. Finally, an epilogue notes new titles and developments since the fall of the Berlin Wall.
