Between Prometheus and Realpolitik

Jan Jacek Bruski
2016-12-05 The Treaty of Riga of March 1921 did not signify real peace. It was soon followed by the outbreak of a Polish-Soviet cold war, which in the early 1920s threatened to reach a boiling point. One of the salient fronts on which it was fought was Ukraine and the Ukrainian question. The means by which it was waged – first by Poland, and subsequently, more successfully, by the Soviets – was by attempts to stir up centrifugal tendencies on enemy territory, leading eventually to the splitting up of the neighboring state along its national seams. Polish-Soviet rivalry over Ukraine had flared up at the Riga peace conference. In the following years both antagonists struggled to win over the sympathies of Ukrainians living on either side of the frontier River Zbrucz (Zbruch) and dispersed in various émigré centers, and the weapons employed were propaganda, diplomacy, nationalities policy,

economic projects, political subterfuge, and armed irredentism. Jan Jacek Bruski's book addresses the first, very important phase of this Polish-Soviet tussle.

Russia's Oil Barons and Metal Magnates

S. Fortescue
2006-10-31 Russia's Oil Barons and Metal Magnates contains a critical analysis of the claims made against oligarchs. In doing so, it presents a detailed analysis of the place of the oligarchs in both the metals sector and in the Russian political economy.

European-Russian Space Cooperation

Brian Harvey
2021-05-12 The story of European-Russian collaboration in space is little known and its importance all too often understated. Because France was the principal interlocutor between these nations, such cooperation did not receive the attention it deserved in English-language literature. This book rectifies that history, showing how Russia and Europe forged a successful partnership that has continued to the present day.

Space writer Brian Harvey provides an in-depth picture of how this European-Russian relationship evolved and what factors—scientific, political and industrial—propelled it over the decades. The history begins in the cold war period with the first collaborative ventures between the Soviet Union and European countries, primarily France, followed later by Germany and other European countries. Next, the chapters turn to the missions when European astronauts flew to Russian space stations, the Soyuz rocket made a new home in European territory in the South American jungle and science missions were flown to study deep space. Their climax is the joint mission to explore Mars, called ExoMars, which has already sent a mission to Mars. Through this close examination of these European-Russian efforts, readers will appreciate an altogether new perspective on the history of space exploration, no longer defined by competition, but rather by collaboration and cooperation.

ECJ--recent Developments in Direct Taxation

Michael Lang 2006-01-01 A growing number of cases pending before the European Court of Justice (ECJ) concern the fundamental freedoms and direct taxation. This book scrutinises the national background of the most important of these cases and examines possible infringements of fundamental freedoms. The focus of each analysis is on the questions submitted to the ECJ by the national courts. Moreover, where available, the opinion of the Advocate General is discussed. The cases are presented by esteemed national and European tax law experts. This book goes to the heart of the national tax systems, exposing hidden obstacles to fundamental freedoms.

Air University Review 1962
Words, Bodies, Memory Lars Kleberg 2019-08-20 This book is a celebration. It praises the many innovative aspects of Irina Sandomirskaja's contributions to a variety of fields in the humanities and Slavic studies, in particular through the numerous colleagues who mirror the impact of her work in their own research and thought. As such, this celebration is also an expression of academic gratitude and a gesture of friendship.

Theory of Elasticity and Plasticity Valentin Molotnikov 2021 This book serves as a core text for university curricula in solid body mechanics and, at the same time, examines the main achievements of state of the art research in the mechanics of elastic and non-elastic materials. This latter goal of the book is achieved through rich bibliographic references, many from the authors' own work. Distinct from similar texts, there are no

claims in this volume to a single universal theory of plasticity. However, solutions are given to some new problems and to the construction of models useful both in pedagogic terms for students and practical terms for professional design engineers. Examples include the authors' decisions about the Brazilian test, stability of rock exposure, and pile foundations. Designed for both upper-level university students and specialists in the mechanics of deformable hard body, the material in this book serves as a source for numerous topics of course and diploma concentration.

approaches the study of language in society in its broadest sense, as a truly international and interdisciplinary field in which various approaches, theoretical and empirical, supplement and complement each other. The series invites the attention of linguists, language teachers of all interests, sociologists, political scientists, anthropologists, historians etc. to the development of the sociology of language.

Medicinal Plants of Central Asia: Uzbekistan and Kyrgyzstan Sasha W. Eisenman
2012-09-14 This unique book is a collaborative effort between researchers at Rutgers University and colleagues from numerous institutions in Uzbekistan and Kyrgyzstan. It will be the first book to document more than 200 of the most important medicinal plants of Central Asia, many whose medicinal uses and activities are being described in English for the first time. The majority of the plants described grow wild in Central Asia with some being endemic,

while other species have been introduced to Central Asia but are commonly used in regional plant based medicine. The book contains four introductory chapters. The first and second chapters cover the geography, climate and vegetation of Kyrgyzstan and Uzbekistan, respectively. The third chapter provides a brief history of medicinal plant use and science in Central Asia and the fourth chapter contains general information about phytochemistry. The fifth chapter comprises the bulk of the book and covers 208 medicinal plant species. Nearly all species have one or more high quality, color photographs. Three useful appendices have been included. The first is a glossary of botanical and ecological terms, the second is a glossary of chemistry terms and the third is a glossary of medical terms. During the preparation of this manuscript we found there to be a deficiency in quality reference resources for the translation of many of the technical terms associated with

the different branches of science covered in this book. In order to make our job easier we compiled glossaries over the course of preparing the manuscript and have included them feeling that they will be an extremely valuable resource for readers.

Historical Dictionary of Russian and Soviet Cinema Peter

Rollberg 2016-07-20 Russian and Soviet cinema occupies a unique place in the history of world cinema. Legendary filmmakers such as Sergei Eisenstein, Vsevolod Pudovkin, Dziga Vertov, Andrei Tarkovsky, and Sergei Paradjanov have created oeuvres that are being screened and studied all over the world. The Soviet film industry was different from others because its main criterion of success was not profit, but the ideological and aesthetic effect on the viewer. Another important feature is Soviet cinema's multinational (Eurasian) character: while Russian cinema was the largest, other national cinemas such as Georgian, Kazakh, and

Ukrainian played a decisive role for Soviet cinema as a whole. The Historical Dictionary of Russian and Soviet Cinema provides a rich tapestry of factual information, together with detailed critical assessments of individual artistic accomplishments. This second edition of Historical Dictionary of Russian and Soviet Cinema contains a chronology, an introduction, and a bibliography. The dictionary section has over 600 cross-referenced entries on directors, performers, cinematographers, composers, designers, producers, and studios. This book is an excellent access point for students, researchers, and anyone wanting to know more about Russian and Soviet Cinema.

The World Encyclopedia of Battleships and Cruisers

Peter Hore 2011-06 This is an illustrated history of international naval warships from 1860 shown in archive photographs. It presents an illustrated history of battleships and cruisers from 1860, featuring descriptions of ships detailing their construction, function and history. It includes three directories for both battleships and cruisers, each focusing on a particular time period - pre-World War I, World War I, then World War II. The boxes provide information about each ship's country of origin, launch date, size, weight, power, performance. It features colour and black-and-white archive photographs from naval and

military sources. This book is split into two sections, the first focusing on the history of the battleship, and the second on the cruiser. Each section includes a history and three chronological directories.

The General Theory of Law and Marxism

Evgeny Pashukanis 2017-09-04 E. B. Pashukanis was the most significant contemporary to develop a fresh, new Marxist perspective in post-revolutionary Russia. In 1924 he wrote what is probably his most influential work, *The General Theory of Law and Marxism*. In the second edition, 1926, he stated that this work was not to be seen as a final product but more for "self-clarification" in hopes of adding "stimulus and material for further discussion." A third edition was printed in 1927. Pashukanis's "commodity-exchange" theory of law spearheaded a perspective that traced the form of law, not to class interests, but to capital logic itself. Until his death, he continued to argue for the ideal

of the withering away of the state, law, and the juridic subject. He eventually arrived at a position contrary to Stalin's who, at that time, was attempting to consolidate and strengthen the state apparatus under the name of the dictatorship of the proletariat. Inevitably, Pashukanis was branded an enemy of the revolution in January 1937. His works were subsequently removed from soviet libraries. In 1954, Pashukanis was ""rehabilitated"" by the Soviets and restored to an acceptable position in the historical development of marxist law. In Europe and North America, a number of legal theorists only rediscovered Pashukanis's work in the late 1970s. They subjected it to careful critical analysis, and realized that he offered an alternative to the traditional Marxist interpretations, which saw law simply and purely as tied to class interests of domination. By the mid-1980s the instrumental Marxist perspective in vogue in Marxist sociology, criminology, politics,

and economics gave way, to a significant extent due to Pashukanis's insights, to a more structural Marxist accounting of the relationship of law to economics and other social spheres. In his new introduction, Dragan Milovanovic discusses the life of Pashukanis, Marx and the commodity-exchange theory of law, and the historical lessons of Pashukanis's work. This book [The Rebirth of the Russian Space Program](#) Brian Harvey 2007-05-10 This, fifty years after Sputnik, is the definitive book on the Russian space program. The author covers all the key elements of the current Russian space program, including both manned and unmanned missions. He examines the various types of unmanned applications programs as well as the crucial military program, and even analyzes the infrastructure of production, launch centres and tracking. You'll also find discussion of the commercialization of the program and its relationship with western companies.

Russia's current space experiment is also put in a comparative global context. Strong emphasis is placed on Russia's future space intentions and on new programs and missions in prospect.

interpretation of the logic and direction of his theory. The chapters cover a number of important themes, including: The chronology of Vygotsky's ideas and theory development, and the main core of his theoretical writings Relationships between Vygotskians and their Western colleagues The international reception of Vygotskian psychology and problems of translation The future development of Vygotskian science Using Vygotsky's published and unpublished writings the authors present a detailed historical understanding of Vygotsky's thought, and the circumstances in which he worked. It includes coverage of the organization of academic psychology in the Soviet Union, the network of scholars associated with Vygotsky in the interwar period, and the assumed publication ban on Vygotsky's writings. This volume is the first to provide an overview of revisionist studies of Vygotsky's work, and is the product of close international

collaboration between revisionist scholars. It will be an essential contribution to Vygotskian scholarship, and of great interest to researchers in the history of psychology, history of science, Soviet/Russian history, philosophical psychology and philosophy of science.

Hitler - Benes - Tito Arnold Suppan 2019-11-05 In the spring of 1945, Fuhrer and Reich Chancellor Adolf Hitler, President Edvard Benes, and Marshal Josip Broz Tito stood as examples of the complete rupture between the Germans and Austrians on the one hand, and the Czechs, Slovaks, Slovenes, Croats, Serbs, and Bosniaks on the other. The total break that occurred in World War II with war crimes, crimes against humanity, and even genocides (particularly against the Jews and "Gypsies") had a long pre-history, beginning with violent nationalist clashes in the Habsburg Monarchy during the revolutions of 1848/49.

Therefore, this monograph - based on a broad range of international primary and

secondary sources - explores the development of the political, legal, economic, social, and cultural "communities of conflict" within Austria-Hungary, especially in the Bohemian and South Slavic countries, the making of the Paris Peace Treaties in 1919/20 by violating President Wilson's principle of self-determination, particularly in drawing new borders and creating new economic units, and the perpetuated ethnic-national conflicts between Czechs and Germans, Slovaks and Magyars, Slovenes and Germans, Croats and Serbs as well as Serbs and Germans in the successor states, deepening the differences between the nations of East-Central Europe. Although many kings, presidents, chancellors, ministers, governors, diplomats, business tycoons, generals, Nazi-Gauleiter, higher SS and police leaders, and Communist functionaries have appeared as historical actors in the 170 years of East-Central and Southeastern European history, Hitler,

Benes, and Tito remain especially present in historical memory at the beginning of the twenty-first century.

Stalin's fascination with writers was fully reciprocated as the many 'Odes to Stalin' show. During the 1970s a hugely elaborated system was

established for the regulation of belles-lettres based on institutions, ideas and individuals. This original study, ten years in preparation, is based on extensive access to Soviet archives. Much new evidence has been uncovered about the inner workings of cultural policy in the Stalin period and documents by Stalin himself are published for the first time.
